

ITSM (medior) consultant

Description

IT Service Management

Deriving value from ServiceNow ITSM

IT Service Management (ITSM) helps you to provide high-quality IT services to ensure consumers of these services—the business—are satisfied. Business users need to focus on doing their work, not spend time solving IT issues. At the same time, providing high-quality IT services should be cost-effective. In reaching these objectives, our ITSM implementation focuses on several key themes: provide great experiences, continuous improvement, intelligent automation, high-quality data, and staying Out-Of-The-Box (OOTB).
